Here is the directory structure of my monolouq project. index.php monolouq/english/ monolouq.php spanish/ The index.php file contains a single line, which is . When I visit the index.php file, the monolouq.php file gets loaded automatically. The content of the english folder is defined in the monolouq.php file. I want to have the content in the spanish folder (i.e. the directory in which the monolouq.php file is located) to be displayed in the index.php file. I have also tried the following things, and: The last two options work and give me the english content of monolouq.php in index.php, but it does not work when i use this in the index.php: 82157476af
